ADULT PROGRAMS

It's never too
late to learn
to skate!

Beginner
&
Advanced

In Canada, skating is part of our social fabric

For generations, Canadians have stepped onto backyard rinks, frozen rivers, ponds and arenas from coast to coast to coast. Skating is part of who we are, and Skate Canada is the perennial leader in teaching Canadians how to skate.

Some dream of reaching an Olympic figure skating podium, or enhancing skating skills for hockey, ringette, or speed skating. Others are looking to go for a leisurely glide with family for fun, fitness, and a healthy lifestyle. Whatever your skating goals, Fliteway will help get you there.

ADULT CANSKATE

This group program is for skaters who want to learn basic skating skills and build general confidence on the ice. Great for first time skaters or skaters with little experience.

ADULT FIGURE SKATING

This program is great for former figure skaters or adults wanting to learn figure skating. Skaters must have a general skating background to enter into this program.

New Program TEEN SKATE

Teen SKATE is a learn-to-figure skate program for skaters 11 years and older. The program follows the same curriculum as our STAR Academy Program, making it a perfect fit for skaters just out of CanSkate and wanting to take up Figure Skating. The program starts with 1 day a week with options for adding more days as the season progresses.
